**If the company has more than 5 affiliates:**

The statistic is an annual inventory of Danish foreign affiliates that are owned or controlled by a Danish parent company. The location (country), industry, employment, staffing costs, net turnover, and additions to tangible non-current assets of foreign affiliates are reported

As Statistics Denmark has knowledge of six or more foreign affiliates of the company, it is only possible to report via a pre-filled Excel spreadsheet which can be downloaded [here](#).  
This solution has been created to reduce the respondent burden.

- To proceed, you must download an Excel sheet via this [link](#)
- The sheet contains prefilled information about the affiliates of which we have knowledge.
- Save the sheet on your PC.
- Fill out the sheet for all companies – including new affiliates.
- Finish the report by uploading the filled out sheet [here](#) ►

If the company has up to 5 affiliates:

The following overview is prefilled. Any new or other affiliate must be added.
