

Bilag 4.**Nøgle mellem 111-standardgruppering og 6-cifrede brancher**

Nøglen Danmarks Statistik har organiseret det samlede antal registrerede brancher i fire standardgrupperinger. Grupperne er udgangspunktet for anvendelsen af DB03 i forbindelse med offentliggørelse af statistik fra Danmarks Statistik, jf. bilag 3. Nøglen mellem 111-grupperingen og de tilhørende 6-cifrede branchekoder ses i den efterfølgende liste. I listen er 111-grupperingen fremhævet med fed skrift mens de brancher, der dækkes, er fremført med normal skrift.

Information i endetallet Når koder i 111-standardgrupperingen ender på 0 vil kodens første cifre som hovedregel være identisk med de første cifre i de DB03 brancher, der indgår i standardgruppen. Ender koden på 9 er dette ikke tilfældet. Begyndelsescifrene vil da typisk være cifrene fra den laveste DB03 branche, der indgår i standardgruppen.

Landbrug, fiskeri, råstofudvinding
